Quantity allocation among eligible vendors shall be based on pre decided tender criteria.

d. Whenever tender is floated with purchase restrictions from sources approved by nominated authorities and there exists a suspected cartel situation by approved sources or the rates available from approved source/ sources are adjudged unreasonably high, despite fair efforts as

17 Splitting of tendered quantities:

17.1 Case of no prior decision to split the order:

17.1.1 Normally full order should be placed on L-1 firm. However, if after due processing, it is discovered that the quantity to be ordered is more than what L-1 alone is capable of supplying and there was no prior decision to split the quantities, then this aspect should be recorded in TC minutes / acceptance in direct acceptance cases. The quantity being finally ordered will be distributed among other bidders in a manner that will be fair, transparent and equitable. The manner of splitting will take specific note of the following parameters

- (i) Past performance of bidders
- (ii) Capacity of bidders
- (iii) Delivery requirements in the tender
- (iv) Quantity under procurement
- (v) Vital / safety nature of the items

17.1.2 In the absence of any differentiation on the above parameters, the manner of splitting will be based on the stipulation given in para 17.2.2 below

17.2 Case of pre-decided Split Ordering:

17.2.1 KRIDE may decide in advance to have more than one source of supply on account of delivery requirement in tender, past performance and capability of bidders, quantity under procurement and vital / safety nature of items.

17.2.2 Following provisions shall be applicable in all such cases of pre-decided split ordering:

(A) The

purchaser reserves the right to distribute the procurable quantity on one or more of the eligible tenderers. The Zone of consideration of such eligible tenderers will be the right of the purchaser. The Zone of consideration will be a dynamic mix of inter-se position of firms, quantity being procured, criticality of and lead time of supply of the item, number of established suppliers, their capacity etc.

(B) Whenever such distribution/ splitting of the tendered/ procurable quantity is made, the quantity distribution will depend (in an inverse manner) upon the differential of rates quoted by the tenderers (other aspect i.e. adequate capacity-cum-capability, satisfactory past performance of the tenderers, outstanding order load for the R a i l w a y / KRIDE making the procurement, quoted delivery schedule vis-à-vis the delivery schedule incorporated in the tender enquiry etc. being same / Similar) in the manner as detailed below:

Price differential between L1 and L2	Quantity distribution ratio between L1 and L2
Up to 3%	60:40
more than 3% and up to 5%	65:35
more than 5%	At least 65% on the L1 tenderer. For the quantity to be ordered on the L2 tenderer, TC/TAA will decide

In the phrase ‘differential rates quoted by the tenderers’, the quoted rate would mean

i) When no price negotiation has been called for, the original rates as obtained at the time of tender opening. However, the rate of the highest eligible tenderer within the zone of consideration has to be per se reasonable.

ii) When the price negotiation has been called for, the reference L1 rate for assessment of ratio will be the original rate of L1 firm (suitable for bulk quantity) – say firm “A” – as obtained at the time of tender opening.

(B) (i) If splitting of quantity is required to be done by ordering on tenderers higher than the L2 tenderer, then the quantity distribution proportion amongst the tenderers will be decided by transparent/ logical/ equity-based extrapolation of the model as indicated above.

17.2.3 in cases of pre-decided splitting, if the purchaser decides not to split the ordered quantity, the reason for the same should be in TC minutes / acceptance in direct acceptance cases.

17.3 In the case of inadequate capacity-cum-capability, dissatisfactory past performance, large quantity of outstanding orders (liquidation of which will take very long time) etc, the purchaser shall have the right to distribute the procurable quantity amongst tenderers with due consideration to these constraints and in such manner as would ensure timely supply of materials in requisite quantity to meet the needs of operation, maintenance safety etc. of the KRIDE, regardless of the inter-se ranking of the tenderers and in a fair and transparent manner with due conformity to the Principles of natural Justice and Equity.

17.4 In this tender, pre-decided split ordering shall be applicable.

17.5 Not Applicable.

17.6 Orders on developmental vendors shall be developmental orders and shall not amount to splitting.

23.3. Clarifications

23.3.1 The purpose of Reasonable Notice for exercise of (-) 30% Option Clause consequent to decrease in prices subsequent to the placement of contract should be served by giving a reasonable opportunity to the contractor to unconditionally agree to accept such lower rates for the quantity unsupplied on the date of reduction/decrease of prices or the (-) 30% quantity, whichever is less. Here also, no consent from the contractor towards exercise of the contractual Option Clause is necessary.

23.3.2 In case DP is extended in contract with (+) 30% Option Clause either for the full ordered quantity or a part quantity which remained unsupplied on the date of expiry of the original DP, then during the extended delivery period also, quantity variations can be made on the total ordered quantities.

23.3.3 Reasonable notice as mentioned above is only for the purpose of allowing the contractor suitable time to make necessary arrangements for the supplies and not for seeking any consent from the contractor towards exercise of the contractual Option Clause.
